

Clean Burn Waste Oil Furnaces

Volume 3, Issue 7

ECO HEATING SYSTEMS, INC.

July 2014

The "Cradle to Grave" Liability Process

Cradle to Grave Liability

Did you know that as a business owner who generates waste oil, you have "cradle to grave liability" concerning the disposal of your waste oil? This means YOU are responsible for what happens to your oil from the time you collect it in your shop until it reaches its final resting place. For example, if a waste oil hauler has an accident while hauling your oil, YOU are responsible should the oil spill. You are also responsible should the waste oil hauler dispose of the oil he collected at your facility in an improper manner. In addition to liability issues, the hauling and refining of waste oil leaves a big footprint upon the environment as it takes extra transportation and handling to process the oil.

Clean Burn is a strong advocate of environmental protection and energy conservation. Our multi-oil heating systems, storage tanks and recycling centers, which meet all EPA requirements for waste oil recycling, eliminate extra handling and transportation of waste oils and, consequently, help avoid the possibility of waste oils entering our water supplies. Burning your waste oil on-site has proven to be the most economical and environmentally friendly solution for managing your waste oil.

* Offers not valid on Saturn furnaces.

*Offers only valid on furnaces installed by Eco Heating Systems.

In a world faced with severe environmental challenges, Clean Burn just makes sense. Recycling your waste oil through on-site heat recovery reduces the risks of spills and contamination. The use of waste oils as a fuel source sharply reduces pressure on natural gas and fuel oil supplies. Clean Burn waste oil combustion meets or exceeds every Environmental Protection Agency (EPA) requirement for helping preserve clean air.

Attention!

If you have received a quote from us in the past six months, please sign and return it **immediately** so we can honor its pricing. Clean Burn sent notification that prices are increasing this fall.

Eco Heating Systems is giving advance warning to help you avoid higher costs.

Please don't wait and get left out in the cold!
