

Clean Burn Waste Oil Furnaces

Volume 3, Issue 11

ECO HEATING SYSTEMS, INC.

November 2014

COLD Weather IS On Its Way.

Please find below a couple of tips that can help keep your Clean Burn running .

Monitor the oil supply in your tank. Make sure you have sufficient good oil. With this extremely cold weather, you will use oil at a much faster rate. Make sure there is plenty of oil in the tank to last over night. Make sure your oil is not contaminated with antifreeze, water or sludge.

Make sure your air compressor is in a warm environment. Make sure there is no water in your air compressor or the air compressor line. Water in the air compressor could freeze and cause your air compressor not to work. Your furnace will not operate without air coming from your air compressor.

We welcome new members to the Clean Burn family, here are a few!

Jiffy Lube #1901 in Mount Airy, Maryland had Eco Heating Systems install a CB3250.

Jim Barbey Automotive in White Marsh, Maryland had Eco Heating Systems install a CB1750 after visiting us at the WMDA Show

Spirit of America Car Wash in Waldorf, Maryland had Eco Heating install a CB3250 =- they now have 6 Clean Burn waste oil furnaces.

WELCOME!!!
