

SATURN 140 & SATURN 230 WASTE OIL FURNACES

OUT OF THIS WORLD HEATING SOLUTIONS

All of the Saturn features provide you with a completely customizable waste oil furnace suited to your specific heating needs.

Excellent Efficiency

- Engineered from the ground up to burn all waste oil types
- Three-pass heat exchanger for greater efficiency
- Special internal combustion sleeve maintains consistent flame heat

Advanced Burner Design

- Regulates pre-heated oil and air for maximum flame control
- No fuel adjustment required
- Modular design for easy service
- Smart control with auto-restart for safe, reliable ignition

Easy Installation

- Fan blade provides versatility of placement for unit; it can be installed in lower ceiling areas
- Movable louvers allow for more direct air flow
- Chimney can be installed from either side of the furnace

Easy Maintenance

- Front door and burner swing out for easy cleaning
- Average 1,000 hour clean out
- Breach located either side for easy clean out

Made by Clean Burn

- Recognized leader in waste oil furnaces
- Supported by factory trained, expert installation and service technicians
- Your assurance of continued service and parts availability

All Saturn Furnaces Include:

- Louvers
- Canister filter
- Check valve and screen
- Wall thermostat
- Barometric damper
- Connector block
- Oil and air supply components
- Bolts and fittings for assembly

UL Listed in the United States and Canada and comply with EPA regulations
